Welcome to Week 8!

The weeks seem to be flying straight by. Week 8 proves to be another busy week with Harmony Day and Cross Country. The SRC are raising money for the victims of the Queensland Floods. We would appreciate it if everyone came to school on Thursday wearing something orange. Please don’t forget your gold coin donation and make sure you and your parents order our special sausage sizzle lunch. A great big thankyou goes out to Vittoria of 1/2C and family who have kindly donated bottles of water. Your donation is kindly appreciated by SRC and myself.

If your child has not purchased a mathematics textbook, they need to do so. Our textbooks consolidate learning in class and are marked everyday to ensure your child understands the concepts addressed. Any homework/textbook work that is not completed at home will be done in the students’ lunchtime. If there are any issues please write me a note. The excuse of ‘I left it at home’ or ‘mum forgot to pack it’ will not be accepted.

Students should be working on their rainforest projects. Please remember that students need to use other sources of information other than the internet. If there are any concerns, please come and see me now, not on the due date. Late submissions will not be accepted. The marks from this project will assist me with the student’s reports for term 2.

Last Friday, our class experienced the robotic workshop. The students were amazing in their teamwork and I think we may have some outstanding future engineers here at Horsley Park.

Have a Lovely Week

Miss Dunn
